This publication is protected by copyright under the Commonwealth of Australia Copyright Act 1968.

NATA's accredited facilities or facilities seeking accreditation may use or copy this publication or print or email this publication internally for accreditation purposes.

Individuals may store a copy of this publication for private non-commercial use or copy a reasonable portion of this publication in accordance with the fair dealing provisions in Part III Division 3 of the Copyright Act 1968.

You must include this copyright notice in its complete form if you make a copy of this publication.

Apart from these permitted uses, you must not modify, copy, reproduce, republish, frame, upload to a third party, store in a retrieval system, post, transmit or distribute this content in any way or any form or by any means without express written authority from NATA.

This document lists the descriptors for services currently able to be accredited for environment.

In addition to referencing ISO/IEC 17025, environment and the applicable services listed below, scopes of accreditation will include the material/item/product tested, the determination, the technique used and the procedure adopted.

The list below will be updated as new services are accredited.

<b>Services</b>
Analysis for asbestos and synthetic mineral fibres
Analysis for bacteriophage
Analysis for carbamate pesticides
Analysis for chlorinated dioxins and dibenzofurans
Analysis for cyanide
Analysis for diesel particulates
Analysis for elements
Analysis for engine emissions
Analysis for enteric protozoa
Analysis for explosives
Analysis for free living protozoa
Analysis for fungicides
Analysis for helminths
Analysis for herbicides
Analysis for hydrocarbons
Analysis for industrial chemicals
Analysis for isocyanates
Analysis for macroinvertebrates
Analysis for macrophytic algae
Analysis for macrophytic plants

<b>Services</b>
Analysis for microinvertebrates
Analysis for microorganisms
Analysis for nionicotinoid pesticides
Analysis for non-planktonic microalgae and cyanobacteria
Analysis for nutrients
Analysis for organic vapours
Analysis for organochlorine pesticides
Analysis for organophosphate pesticides
Analysis for petroleum hydrocarbons
Analysis for phenols
Analysis for phthalates
Analysis for physical and chemical characteristics
Analysis for phytopigments
Analysis for planktonic microalgae and cyanobacteria
Analysis for polybrominated diphenylethers
Analysis for polyhalogenated biphenyls
Analysis for pyrethroid and pyrethrum pesticides
Analysis for respirable quartz
Analysis for serpentine
Analysis for synthetic pesticides
Analysis for veterinary chemical residues
Analysis of inhalable and respirable dust
Analysis of mine atmospheres for gases
Analysis of mine roadway dusts

<b>Services</b>
Analysis of the workplace environment and hazards for inorganic gases
Analysis of the workplace environment and hazards for metals and metal compounds
Analysis of the workplace environment and hazards for radiation exposure
Analysis of the workplace environment in confined spaces
Atmospheric pollution monitoring
Detection, characterisation and/or quantification of nucleic acids
Detection, characterisation and/or quantification of nucleic acids - Marine species
Detection, characterisation and/or quantification of nucleic acids - Protozoa
Detection, characterisation and/or quantification of nucleic acids - Terrestrial species
Detection, characterisation and/or quantification of nucleic acids - Viruses
Ecotoxicology studies
Investigative analysis of materials for unknown substances
Measurement of ionising radiation
Meteorological monitoring
Mycological analysis
Sample collection
Sample collection - Stack and emissions sampling
Terrestrial biology studies

## Amendment Table

The table below provides a summary of changes made to the document with this issue.

<b>Amendment</b>
New document incorporating some of the previous services covered by specific classes/subclasses of tests in the fields of Biological and Chemical Testing. This new document describes the revised nomenclature for describing these services able to be covered by scopes of accreditation.
