Business Continuity Policy

NATA is committed to maintaining and continually improving a business continuity management system (BCMS) in line with the requirements of AS ISO 22301 *Security and resilience - Business continuity management systems - Requirements*. The BCMS will be comprised of this policy and the necessary procedures and plans that will allow us to:

- protect against;
- reduce the likelihood of;
- prepare for;
- respond to; and
- recover from threats to the continuity of our services.

A BCMS that is up-to-date and regularly validated for its operability, provides confidence to stakeholders that NATA is adequately equipped to continue to operate and remain effective during disruptions. It also reduces unnecessary financial exposure related to the cost of disruptions.

The BCMS will provide a framework for setting business continuity objectives which are aligned with the objectives of our Strategic Plan.

The BCMS will underpin business continuity through the implementation of a systematic process of business risk identification and risk assessment (including impact analysis). This in turn will enable the identification of suitable strategies and solutions to manage and maintain business activities in the event of a disruption, until normal service can be resumed.

To support the implementation of our BCMS we will:

- commit to ensure that appropriate resources are provided to implement, maintain and continually improve the BCMS;
- communicate this policy to all existing employees and to new employees upon commencement;
- make this policy available to all interested parties;
- comply with all legislative and other requirements which are relevant to NATA.
