

Background Memo

Document:	<i>Specific Accreditation Criteria: ISO/IEC 17025 Application Document, Manufactured Goods - Annex, Software product and information system testing</i>
Date:	19 November 2025
Key changes:	Please refer to the amendment table on the last page of the draft.
Background:	<p>This is a draft revision of the NATA document <i>Specific Accreditation Criteria: ISO/IEC 17025 Application Document, Manufactured Goods - Annex, Software and information system performance testing</i>. The current version is dated July 2018.</p> <p>This document interprets the requirements of ISO/IEC 17025 for accredited facilities conducting software testing (including gaming) and information security evaluations (AISEP). The document has been renamed to reflect the product-centric nature of this testing.</p> <p>Some requirements in the July 2018 version of the document have been removed as they have been superseded by other existing NATA Accreditation Criteria publications.</p> <p>Some of the informative guidance in the July 2018 version ('should', 'may') will become normative requirements ('shall'). The draft revision also includes new technical requirements.</p>
