

ISO/IEC 17020:2026 Implementation Checklist

Instructions

This checklist identifies the clauses of ISO/IEC 17020:2026 where there are new or major changes to requirements compared to the previous 2012 version of the Standard.

Details of all changes (minor, major and new) to requirements in the new version of the Standard, compared to the previous version, are documented in the *Gap Analysis* available from the NATA website NATA Accreditation Criteria (NAC) Packages under Inspection (ISO/IEC 17020) Accreditation at <https://nata.com.au/news-and-events/publications-library/#17020>.

Prior to an accredited facility's scope of accreditation being updated to the new version of the Standard, a response together with supporting evidence to the clauses identified in this checklist must be provided. Confirmation of compliance will occur during the on-site NATA assessment.

Authorised Representative declaration

I declare to the best of my knowledge that the requirements of ISO/IEC 17020:2026 have been considered and implemented:
