This publication is protected by copyright under the Commonwealth of Australia Copyright Act 1968.

NATA's accredited facilities or facilities seeking accreditation may use or copy this publication or print or email this publication internally for accreditation purposes.

Individuals may store a copy of this publication for private non-commercial use or copy a reasonable portion of this publication in accordance with the fair dealing provisions in Part III Division 3 of the Copyright Act 1968.

You must include this copyright notice in its complete form if you make a copy of this publication.

Apart from these permitted uses, you must not modify, copy, reproduce, republish, frame, upload to a third party, store in a retrieval system, post, transmit or distribute this content in any way or any form or by any means without express written authority from NATA.

This document lists the descriptors for services currently able to be accredited for animal health.

In addition to referencing ISO/IEC 17025, Animal Health and the applicable services listed below, scopes of accreditation will include the material/item/product tested, the determination, the technique used and the procedure adopted..

The list below will be updated as new services are accredited.

Services
Analysis for agricultural chemical residues
Analysis for drugs and chemicals for toxicological (non legal) purposes
Analysis for elements
Analysis for trace elements
Analysis for transmissible animal diseases under the European Union Directives for Animal Health
Analysis of calculus
Analysis of excreta
Analysis of non-clinical samples for microorganisms
Analysis of non-clinical samples for residues and contaminants
Antibiotic sensitivity (susceptibility) testing
Bacteriology - Detection of pathogenic bacteria
Blood grouping
Bone marrow examination
Chemical pathology - Investigation and determination of hepatic, cardiac, bone, skeletal muscle and other profiles and metabolic studies
Cytopathology investigations
Detection and identification of bacteria
Detection and identification of fungi and moulds
Detection and identification of molluscs
Detection and identification of other microorganisms

Detection and identification of parasites and arthropods	
Detection and identification of viruses	
Detection and quantitation of drugs for therapeutic monitoring	
Determination of compatibility of blood donor units	
Determination of hormones and hormone binding proteins	
Diagnosis of pregnancy	
Examination of biopsy material	
Haematology - Full blood examination	
Haemostasis / coagulation related testing	
Immediate frozen section diagnosis	
Immunoglobulin investigations	
Immunohistochemistry investigation	
Inherited disorders	
Investigation of haemolysis/immunology	
Molecular biology	Detection, characterisation and/or quantitation of microbial nucleic acids (bacteria)
	Detection, characterisation and/or quantitation of microbial nucleic acids (viruses)
Molecular genetics - Bioinformatic analysis and interpretation	
Molecular genetics - Extraction	
Molecular genetics - Sequencing	
Molecular genetics - Sequencing	Allele typing
	Genotype fragment separation
	Ion torrent
	Next generation (MPS)
	Sanger

Necropsy services
Quantitation of vitamins
Sample collection
Serology of infection - Microbial antibody and/or antigen detection and/or quantitation
Virology - Detection of pathogenic viruses

Amendment Table

The table below provides a summary of changes made to the document with this issue.

Amendment
New document replaces the previous <i>Veterinary Testing Classes of Tests</i> . This new document describes the revised nomenclature for describing services able to be covered by scopes of accreditation.
