This document lists the descriptors for services currently able to be accredited for workplace monitoring and/or community screening.

In addition to referencing ISO/IEC 17025, workplace monitoring and/or community screening and the applicable services listed below, scopes of accreditation will include the material/item/product tested, the determination, the technique used and the procedure adopted.

The list below will be updated as new services are accredited.

Service
Monitoring for biomarkers
Monitoring for heavy metals, organometals and trace elements
Monitoring for pesticides
Monitoring for residues, hydrocarbons and other contaminants of the environment (excluding pesticides)

Amendment Table

The table below provides a summary of changes made to the document with this issue.

Amendment
New document incorporating some of the previous services covered by specific classes/subclasses of tests in the field of Chemical Testing. This new document describes the revised nomenclature for describing these services able to be covered by scopes of accreditation.
