NATA's accredited facilities or facilities seeking accreditation may use or copy this publication or print or email this publication internally for accreditation purposes.

Individuals may store a copy of this publication for private non-commercial use or copy a reasonable portion of this publication in accordance with the fair dealing provisions in Part III Division 3 of the Copyright Act 1968.

You must include this copyright notice in its complete form if you make a copy of this publication.

Apart from these permitted uses, you must not modify, copy, reproduce, republish, frame, upload to a third party, store in a retrieval system, post, transmit or distribute this content in any way or any form or by any means without express written authority from NATA.

This document lists the descriptors for activities and services currently able to be accredited for Inspection.

In addition to referencing ISO/IEC 17020 and the applicable activities and services listed below, scopes of accreditation will include the material/item/product, the determination, the procedure adopted and the range/limitation.

The list below will be updated as new activities and/or services are accredited.

Activity	Service
Agribusiness	Meat and meat products for export - Inspection
	Seed production - Inspection
Environment	Indoor air quality - Assessment
	Indoor air quality - Sample collection
	Potentially contaminated sites - Clearance inspection
	Potentially contaminated sites - Sample collection
	Potentially contaminated sites - Survey inspection
Infrastructure and Asset Integrity	Building products and processes - Inspection
	Cargo verification
	Coated and corroded surfaces - Inspection
	Evaluation of elements supporting access and mobility requirements
	Evaluation of load generating lifting appliances
	Evaluation of load handling, rigging and tensioning systems
	Expediting
	Industrial machinery - Inspection
	Industrial processes - Sample collection
	Industrial systems - Inspection

Activity	Service
	Fabricated components and assemblies - Inspection
	Metering systems - Inspection
	Road infrastructure - Inspection
	Load generating lifting appliances - Sample collection
	LPG installations - Inspection
	Mechanical sampling systems - Inspection
	Mobile equipment - Periodic inspection
	Play areas - Inspection
	Pressure plant, pipelines and equipment - Design verification
	Pressure plant, pipelines and equipment - Fabrication inspection
	Pressure plant, pipelines and equipment - In-service inspection
	Pressure plant, pipelines and equipment - Inspection
	Transport systems and elements - Inspection
	Underground conduits - Inspection
	Underground conduits - Sample collection of content
	Witnessing
Manufactured Goods	Access protection products - Evaluation
	Diesel engines for use in hazardous atmospheres - Overhaul and maintenance inspection
	Electrical and telecommunication cabling - Evaluation
	Electrical equipment - Evaluation

Activity	Service
	Electromagnetic compatibility (EMC) assessment of manufactured goods
	Expediting
	Explosion-protected electrical equipment - Overhaul and maintenance inspection
	Gaming systems - Evaluation
	Medical devices and disability aids - Evaluation
	Radio communications systems performance - Evaluation
	Timber and timber products - Inspection
Temperature Metrology	Temperature controlled enclosures - Verification

Amendment Table

The table below provides a summary of changes made to the document with this issue.

Amendment
<p>New document replacing the previous <i>Categories of Inspection</i>.</p> <p>This new document describes the revised nomenclature for describing activities and services able to be covered by scopes of accreditation.</p>
