This publication is protected by copyright under the Commonwealth of Australia Copyright Act 1968.

NATA's accredited facilities or facilities seeking accreditation may use or copy this publication or print or email this publication internally for accreditation purposes.

Individuals may store a copy of this publication for private non-commercial use or copy a reasonable portion of this publication in accordance with the fair dealing provisions in Part III Division 3 of the Copyright Act 1968.

You must include this copyright notice in its complete form if you make a copy of this publication.

Apart from these permitted uses, you must not modify, copy, reproduce, republish, frame, upload to a third party, store in a retrieval system, post, transmit or distribute this content in any way or any form or by any means without express written authority from NATA.

This document lists the descriptors for services currently able to be accredited for Medical Imaging.

In addition to referencing the *RANZCR Standards of Practice for Diagnostic and Interventional Radiology* and the applicable services listed below, scopes of accreditation will include the material/item/product, the determination and the technique used.

The list below will be updated as new services are accredited.

Services	
Bone mineral densitometry	
Computed tomography (CT)	
Interventional radiology	Tier A procedures
	Tier B procedures
Magnetic resonance imaging (MRI)	
Mammography	
Nuclear medicine	
Radiography	
Remote x-ray operator services	
Teleradiology	
Ultrasound	

Amendment Table

The table below provides a summary of changes made to the document with this issue.

Amendment
<p>New document replacing the previous <i>Medical Imaging Classes of Tests</i>.</p> <p>This new document describes the revised nomenclature for describing activities able to be covered by scopes of accreditation.</p>
